

AIR.SAFE

GROUP: **0+**
WEIGHT: UP TO **13 KG**
AGE: APPROX. **18 MONTHS**

// THE LIGHTEST BABY CAR SEAT OF ITS KIND

It weighs around 2.9 kg, which makes it the most lightweight baby car seat of its type currently on the market. The big advantage for parents: its low weight means it can be effortlessly lifted, carried and moved from the car to the pushchair or pram. In addition, the CONCORD AIR.SAFE baby car seat has innovative safety construction features. In a similar manner to a cycling helmet, the inner surface of the car seat is reinforced with a honeycomb structure. This results in outstanding damping characteristics in the event of an impact. The rest of the safety features are also more than presentable. The three-point strap system means the baby is kept securely in place in a moving car. The optional AIRFIX Isofix platform lets you secure the car seat even more conveniently and firmly. The adapter on the car seat not only fits the Isofix platform, it is also designed for both the CONCORD NEO and CONCORD FUSION TRAVEL SYSTEM pushchairs. You can fasten the CONCORD AIR to the pushchair in a single movement – easily, quickly and securely. Of course, comfort for your infant is another of our main concerns. The CONCORD AIR.SAFE baby car seat is fitted with soft, padded covers that are easy to remove and wash. For optimal reclining comfort, simply adjust the main strap beneath the seat – far away from tender baby feet. This means no uncomfortable chafing or disruption to the baby's sleep.

- // The most light weight baby carrier of its type, with Isofix attachment: weighs less than 3 kg, effortlessly carried and transferred from car to buggy
- // Entirely new safety design developed according to the bicycle helmet principle
- // 3-point strap system for keeping the child secure
