CONCORD

An icon since 1978

HAPPY 40TH BIRTHDAY, CONCORD!

This year Concord is celebrating its 40th birthday: 40 years dedicated to designing premium products for babies, focusing on safety and comfort for little ones and their families.

For the last 40 years CONCORD has been one of the oldest and most prestigious leading brands in Europe. The success started in 1978, and for many years now CONCORD has been one of the market leaders in the world of child safety, in Germany and in the rest of Europe too.

CONCORD still accompanies young families on their first trips out, offering a wide range of products to suit every situation, creating functional and safe products, taking care of every last aesthetic detail.

Ever since we first started research has always been a priority for us, incorporating new materials or design solutions to increase the safety of our products. CONCORD has long since been considered a leading company in innovation in the sector.

Four decades of being dedicated to understanding the needs of families, continuously developing, and striving to meet those needs. People, time and economic resources all put to use with the aim of making our products the benchmark in the market thanks to people's great experiences using them.

Of course, CONCORD would not be celebrating its birthday today without the trust shown in the brand by the professionals in our sector throughout this whole time. We work every day to continue providing competitive products and the help required to make sure the products reach families.

We are proud of the history of our brand and the work that has been completed by so many generations of people behind the brand. So, we would like to congratulate CONCORD for these 40 magnificent years and we hope we can continue to help children and their families for many years to come.

QUALITY OF THE FABRICS

International fairs, fashion and research portals in the fields of art, fashion, sport, and interior and exterior design all form part of the continuous work carried out by our designers to get the necessary inspiration when it comes to choosing the colours for the new CONCORD collection.

Another important point to complete the quality of the global image of a product is choosing the right details. Our designers are great lovers of detail in the form of labels, decorative seams, prints, rivets, stitching or zips.

MINIMALIST DESIGN

The CONCORD design, whether from a visual or functional perspective, projects clarity, modernity and simplicity.

We only select the elements we consider to be essential and then we present them so that families see them in the same way that we do. Because our products have controls and functions with a universal design, which we cover with fabrics with clean lines, with no visual fussiness, we can transmit the minimalism that is an important part of us.

TECHNOLOGY IN EACH AND EVERY PART

When we buy a CONCORD product, we can see a system of functions and parts that meet the most visible needs. For example, the excellent and compact folding system of our pushchairs, which means they can easily be carried.

However, there is also a whole series of elements that are much less noticeable which, to the same extent or more, make life easier when using the product. For example, a particularly important, yet hardly noticed aspect is the huge impact of the composition of the original CONCORD covers in terms of safety and comfort for the child, as well as for excellent long-term maintenance of the product.

The perfect combination of both aspects of our technology ensures the products are perfect to use.

SAFETY GOING BEYOND REQUIREMENTS

For a product to be included in the new CONCORD collection, it has to comply not only with the international requisites for child restraint safety, but also the additional standards that we demand of ourselves.

Having our own crash test centre means we can test any new detail we have added to our seats with no restrictions whatsoever, thereby taking our safety standards beyond any legal requirements, and obtaining what we believe is the best possible product.
